

11lb Propane Bracket

BKT-2286

Thank you for your purchase of a Power Tank 11lb Propane Bracket. This bracket fits four different off-the-shelf propane tanks. To fit these tanks, we have provided hardware so that you may install the strap in different positions based on your propane tank model. The three mounting locations are identified by letter on the image to the left. Install your strap to the holes based on your tank, identified below.

After tightening the hardware holding the strap, be sure to properly adjust your latch. If the latch seems too loose, adjust the latch tighter by loosening the small lock nut, turning the latch hasp one full turn at a time, and retesting. When the tension is "snug," tighten the small lock nut so the hook does not come loose. The latch must not be adjusted too tightly or you may damage the latch and compromise its strength. Improperly adjusted latches are the number one cause of failure and will not be covered under warranty.

Propane tanks this bracket fits:

- A: 10 lb Manchester 2.5 Gallon (p/n 10228.4)
- B: 11 lb Worthington 2.6 Gallon (p/n 28116)
- B: 11 lb Flame King 2.6 Gallon (p/n YSN011)
- C: 4.25 lb Worthington 1 Gallon (p/n 281149)
